# STEEL|LINE

Loft design steel doors

#We give transparency  
a face.

## INDUSTRIAL LOFT CULTURE

Each loft door is unique - flexible, timeless beautiful and elegant. Our elements combine a modern look with classic elements and offer a high-quality living experience.

Whether living in the city or in the country - Furnishings that exude an urban living feeling are in vogue. The filigree and expressive design of the loft doors made of steel and glass ensures a modern look and can be combined with different furnishing styles.

The partitions, fitted with elegant metal bars, divide large rooms into individual zones without radically separating them from one another. Whether in an industrial environment, in a modern new building, in a Wilhelminian style villa or in an old condominium. Loft doors are real eye-catchers and, with their minimalist elegance, ensure a special sense of space - tailored to current interior trends.

Wir geben Transparenz  
ein Gesicht.

**STEEL|LINE**  
Loft design steel doors

# the art of simplicity

Focused on the essentials.

For elegant rooms with a harmonious overall picture and  
lots of light.

Loft design steel doors

Shapely handle bars:  
Premium (500mm)

Standard  
50 (500mm)

## Steel and glass loft doors for rooms flooded with light

Variant 5 | Sliding door with side panel

You have the choice. What it may be?

An all-glass system with a classic revolving door? The classic among the doors. The Hinges will be on the side edge of the door coated in profile color and thus fall hardly up.

Sliding doors in loft steel look are perfect for interiors with little space. Optionally with wall or ceiling mounting.

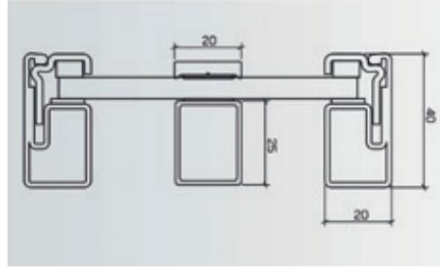

# For a harmonious overall view

Variant 3 | Revolving door with 2 side panels

Construction rung,  
welded on one side

Our profiles/construction bars are powder-coated with  
RAL 9005 deep black.

Variant 1 | 1-leaf revolving door

Through the combination of glass and steel  
rooms with loft steel doors can be opened and  
separated from each other at the same time.  
They also ensure natural incidence of light and  
maximum transparency. The clear lines of the  
doors give structure and enable a harmonious  
division of your living space.

Variant 9 | 1-leaf revolving door with 2 side panels and skylight

## Each loft door is unique

Separate large living areas from each other and keep them

at the same time an unobstructed view of adjoining rooms.

Create a harmonious over

aisle between living area and kitchen Allow for natural light and an inviting entrance between the hallway and living room.

Give your entrance area a special style with a loft door as mo

modern windbreak element.

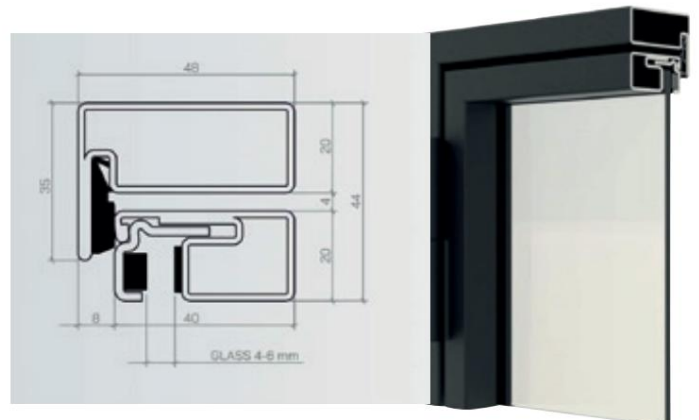

# Surface coating according to RAL

Our profiles are powder-coated in the color of your choice. Our standard colors include RAL 9005 jet black and RAL 9016 traffic white.

Should it be something more individual? Then it is possible to define a color from the RAL palette.

Variant 8 | Revolving door with skylight and side panel

Made-to-measure  
steel loft doors - for everyone  
installation situation the  
right door

It advises you:
